

ForeverAudit

Archive your ProLaw audit trail — permanently, automatically, and without impacting performance.

ProLaw’s built-in audit trail has a retention limit. Once records are deleted, they’re gone — taking your compliance history with them. Large audit tables also slow down ProLaw performance over time. **ForeverAudit** solves both problems by automatically copying audit records to a separate archive database before they’re purged, keeping them accessible through custom reports — forever.

THE CHALLENGE

Audit Trail Limitations

Data Loss	ProLaw deletes audit records after the retention period. Once gone, they cannot be recovered.
Performance Drag	Large audit tables slow down ProLaw as the database grows over time.
Hidden Custom Tabs	Custom tab audit records are buried in separate screens, not visible in the main audit trail.

COVERAGE

Available Modules

Front Office	Contacts, Matters, Events, and Professionals.
Back Office	Journals, Ledger, and Transactions.
Custom Tabs	Contact and Matter custom tab changes appear in the main audit trail.

KEY FEATURES

What You Get

Persistent Audit Archive

Audit trail records are automatically copied to a separate database before ProLaw’s retention period deletes them. Your compliance history is preserved indefinitely — no manual intervention required.

Custom Tab Visibility

ForeverAudit copies custom tab audit information for Contacts and Matters into the main audit trail window. See every change in one place instead of hunting through separate Audit reports.

Zero Performance Impact

By offloading audit records to a dedicated database, ForeverAudit prevents large audit tables from degrading ProLaw performance. SQL stored procedures handle the data flow automatically.

Easy Reporting

Access your full audit history — both current and archived records — through custom reports included with ForeverAudit. Run them directly from ProLaw’s Print Reports menu.

\$600 per module · \$3,000 for all 7 modules · Includes all corresponding reports
